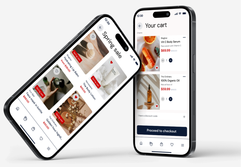
05 Summary

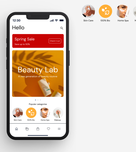
## 01 Challenge

Create an elegant application that allows users to experience a bit of luxury and pleasure while purchasing their favorite cosmetics. Additionally, designing a user-friendly app that enables smooth interaction with the product



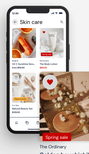
## 02 Home page

"The app's home screen serves as the user's initial interaction, providing a general overview of the available purchases and offerings. It acts as the first point of contact, offering users a glimpse of what they can buy."



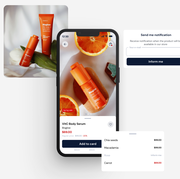
## 02 Products Catalogue

The app's catalog offers users the convenience of easily accessing a diverse array of products or services right at their fingertips.



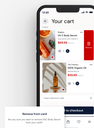
## 03 Product Card

Product cards present product information in a visually appealing manner, allowing users to swiftly review key details such as product name, price, variant capcacity, availability, and description.



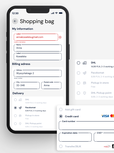
## 04 Your Cart

The cart allows users to review added products, increase their quantity in the cart, or remove a product from the cart.



## 05 Form

The Form allows user to introduce delivery data, delivery form that suits them with the ability to edit shopping bag at any step.



## 06 Summary

Before the user completes the purchase, they are redirected to a summary screen where they can briefly review their order and delivery details.
